The team champion in any division is the team that wins the most overall team matches (not individual matches). In the event that two teams end the season in a tie for first place, the champion is the team with the most overall individual matches won during the season, then head-to-head competition, including individual matches if necessary.

* For divisions that play 4 lines (Women's A1 and A2), the league winners were calculated by awarding 1 point for each team win of 3 courts or more and .5 points to each team for tied matches (i.e., each team wins 2 courts).
